

MOHD ANAS

Data Analyst | Data Scientist | Machine Learning Engineer | AI Engineer

Noida, Uttar Pradesh, India | +91 7055813193 | [Email](#) | [Linkdin](#) | [Github](#)

PROFESSIONAL SUMMARY

Data Scientist and Machine Learning Engineer with 1+ year of experience in analytics systems from large, unstructured datasets. Trained an NLP text classification model to 98% test accuracy, built a recommender system, and engineered an end-to-end agentic RAG platform. Skilled in Python, SQL, scikit-learn, Pandas, and Power BI; automated reporting workflows for 35% faster turnaround and analyzed 50,000+ record datasets to support data-driven decisions.

TECHNICAL SKILLS

Programming & Databases: Python, SQL, MySQL, JavaScript/TypeScript, Git, GitHub, Jupyter Notebook

Machine Learning & NLP: scikit-learn, Supervised Learning, Classification, Regression, Clustering, Recommender Systems, Predictive Modeling, Feature Engineering, Cross-Validation, Model Evaluation, Model Deployment, NLP, NLTK, TF-IDF, Text Classification, Semantic Search

Generative AI & LLM: Retrieval-Augmented Generation (RAG), LangGraph Agents, Prompt Engineering, LLM Tool-Calling, Vector Databases (ChromaDB), Sentence-Transformers Embeddings, Gemini, Groq, OpenRouter, Ollama

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Exploratory Data Analysis (EDA), Data Cleaning & Wrangling, Statistical Analysis, KPI Reporting, Power BI, Apache Superset, Advanced Excel (Power Query, Power Pivot, XLOOKUP, Pivot Tables)

Data Engineering & Deployment: ETL Pipelines, REST APIs, FastAPI, Streamlit, Docker, n8n Workflow Automation, Google Apps Script

PROFESSIONAL EXPERIENCE

MIS Analyst (Data Analytics & Reporting) | Rohan Motors Ltd | Noida, India | Oct 2025 - Present

- Design and maintain the end-to-end MIS reporting architecture, delivering weekly and monthly KPI dashboards used by senior management for executive decision-making.
- Automated recurring reporting workflows using SQL and **Advanced Excel (Power Query, Power Pivot, XLOOKUP)**, reducing manual turnaround time by 35%.
- Built data validation and cleaning routines across multi-source datasets, sustaining 99% accuracy on figures reported to leadership, and consolidated high-volume sales data into repeatable templates.

Data Analytics Intern | Internship Studio | Remote | Nov 2024 - Apr 2025

- Processed and analyzed 50,000+ raw records in **Python (Pandas, NumPy)**, applying **exploratory data analysis (EDA)** to surface sales trends and customer behavior patterns.
- Optimized **SQL extraction queries** with targeted joins, cutting data retrieval time by 30%.
- Delivered automated Power BI dashboards and MIS reports that standardized performance tracking across business units.

DATA SCIENCE & AI PROJECTS

ResearchGPT - Agentic AI Research Platform Python, LangGraph, RAG, ChromaDB, FastAPI, Docker [Link](#)

- Engineered an 8-stage **LangGraph agent pipeline** (planner, research, retrieval, fact-check, writer, report) that autonomously produces fully cited research reports, integrating 13 research sources (arXiv, Semantic Scholar, PubMed, CrossRef) behind a pluggable adapter interface.
- Implemented Retrieval-Augmented Generation with ChromaDB, sentence-transformer embeddings and hybrid vector + BM25 retrieval (reciprocal rank fusion), plus cross-source fact verification with per-claim confidence scoring.
- Shipped production-grade: Python modules (4,200+ lines), REST endpoints, JWT auth, Redis, Celery, Docker and automated tests.

AI Resume Screening & Classification System Python, scikit-learn, NLTK, TF-IDF, Streamlit [Link](#)

- Trained an NLP text classification model routing resumes into 5+ job categories at 98% accuracy on held-out test data; full pipeline of NLTK preprocessing, TF-IDF vectorization and scikit-learn classification, deployed as a Streamlit app.

AI-Powered Food Inventory Assistant n8n, Google Gemini API, Google Sheets, LLM Tool-Calling

- Built a conversational AI agent for real-time stock queries using LLM tool-calling and prompt engineering over Google Sheets as a live database.

Book Recommender System & E-Commerce Sales Dashboard | Python, scikit-learn, Streamlit, Power BI, Power Query

- Built a personalized recommendation engine on user rating data (Streamlit), and modeled 10,000+ transaction records in Power Query into a Power BI dashboard tracking revenue, profit and regional growth. github.com/anaschouhan001

EDUCATION

Master of Computer Applications (MCA) | Glocal University, UP, India | Pursuing 2027

Bachelor of Computer Applications (BCA) | IIMT University, Meerut, India | 2025

CERTIFICATIONS

Data Analytics Certification Course | IT Meerut | Oct 2024
